SUMMARY

Flutter and Mobile App Developer experienced in developing cross-platform and native mobile applications with a focus on performance, usability, and clean code. Currently a Master's Computer Science student at the University of Greenwich, seeking opportunities to contribute to a UK-based technology company.

WORK EXPERIENCE

Junior Mobile App Developer

Sep '25 — Dec '25

Nexroot Technologies Pvt.Ltd

Ahmedabad, India

- Contributed to the development of a real-world mobile application using Flutter, following modern UI/UX and clean architecture practices.
- Implemented Firebase Authentication for secure user login and registration, including email and phone-based authentication.
- Integrated REST APIs to fetch, display, and manage dynamic data within the application.
- Worked on real-time features using Firebase services, improving app responsiveness and user experience.
- Identified, debugged, and resolved application issues, strengthening problem-solving and analytical skills.

Flutter Developer Intern

Apr '25 — Jul '25

Agent PI

Remote

- Developed a ride-hailing (Uber-style) mobile application using Flutter, focusing on performance, usability, and modern UI design.
- Implemented map integration with location search and place name suggestions using mapping APIs to enable accurate pick-up and drop-off selection.
- Integrated multiple REST APIs for location services, routing, and dynamic data handling.
- Implemented distance calculation logic and fare estimation based on route distance and pricing rules.

Android Developer Intern

Dec '21 — May '22

CodeCrew Infotech Pvt.Ltd

Ahmedabad, India

- Developed a native Android application using Java to manage daily income and expenses, helping users track and analyse their personal finances.
- Designed and implemented the complete user interface using XML layouts, following Material Design principles for a clean and intuitive user experience.
- Implemented core application logic for adding, updating, and categorising income and expense records.
- Ensured application performance, usability, and reliability through testing and debugging.

EDUCATION

MSC Computer Science, University Of Greenwich

Jan '26 — Present

London, United Kingdom

Bachelor of Technology, Indus University (GPA: 8.89)

Jul '22 — Jun '25

Ahmedabad, India

PROJECTS

Movana Driving , AgentPi IT Services & Solutions

Jun '25 — Jul '25

Ahmedabad, India

- During my internship, I built a full-stack Uber-style app called **Movana** using **Flutter and Dart**, with separate apps for users and drivers. It included real-time ride booking, live tracking, route mapping, payments, and Firebase integration for authentication, database, and cloud functions.

Personal Portfolio [Link](#)

Ahmedabad, India

- Developed cross-platform mobile apps using **Flutter & Dart**, with efficient **state management via Provider**, custom widgets, and smooth UI/UX.
- Integrated **Awesome Font Icons** and third-party packages to enhance design consistency and functionality.

Ai-ChatBot [Link](#)

Ahmedabad, India

- I developed an AI-powered chatbot using Flutter and integrated it with Google's Gemini API to enable natural language understanding and intelligent responses. The app features a clean and responsive chat interface with message bubbles, input handling, and typing animations. I used GetX for efficient state management and followed clean architecture principles to ensure scalability.
